

Searching & piping

grep - search text in files

find - search filesystem

locate - instant filename search

pipe | - chain multiple commands

find to search filesystem

search files matching a criterion

find [path] [expression]

ex find . → all files in current dir & subdir

find / file.txt → search from root to find
file.txt

locate

search a preindexed database

faster than real-time search

↳ might need redo updatedb

ex

locate *.conf

↳ finds all .conf files

grep

search files

grep [flag] search filename

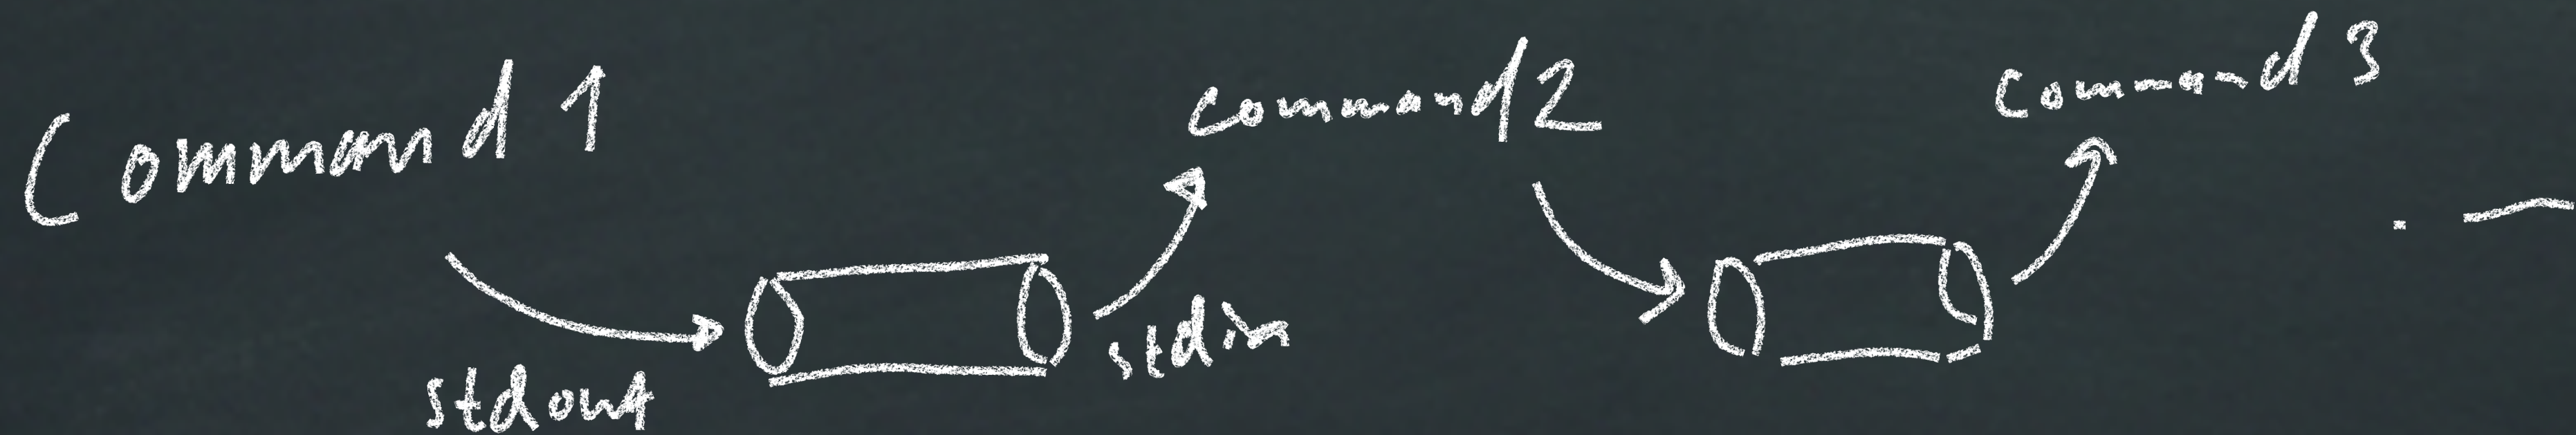

Ex

grep -i helsinki linux.txt

↳ all occurrence of helsinki case insensitive

Piping |

command | command

ex

ls dir* | grep cool | wc -l

→ lists all starting with dir → find cool → count lines
